Advantages of Locally-Grown Trees

Good for your business – Simplified, just-in-time ordering from only one source. We take care of finding the trees that you need at local growers' farms. Order by Tuesday; and receive your trees at your Saturday or Sunday Market locations.

Good for the environment – NYS-grown trees have a short haul distance to Markets; and less trucking is always smart. One acre of real Christmas trees consumes about 500 pounds of carbon dioxide each year; and that same acre produces about 1000 pounds of oxygen annually - the amount that 18 people need to breathe in a year.

Good for your customers – Since trees are cut and delivered to Markets when ordered and travel only a few miles, they will be very fresh. People will be happy with their fresh locally-grown trees that retain their needles longer and have a great fragrance in their homes.

To order your farm-fresh trees and wreaths or to request a price list, contact:
